

# Price tracking

Automatically save on flights and hotels after booking

## BENEFITS

- **Reduces costs, adds value.** Price tracking is capable of generating incremental savings almost immediately, and it makes your life a little easier too.
- **Keeps employees happy.** The service won't inconvenience employees or alter their travel plans. They keep the same flights and/or hotel properties on the same travel dates.
- **Supports travel policy compliance, enhances your program.** Employees gain more confidence to book trips earlier and with CWT, because they know they're getting the lowest available airfares and hotel rates—even after booking.

## PROOF POINT

CWT clients that use price tracking have saved up to 2 percent of total spending.

## Delivering return on investment through post-booking price drops

Price tracking helps even mature programs capitalize on price fluctuations and stretch travel budgets further without disrupting employees or affecting their plans. Our service follows this simple premise: Find a lower price after booking; rebook at the new price; save money. There's no catch or risk. Rebooking always yields bottom-line savings. If price tracking doesn't find net savings, the reservation remains unchanged, and it doesn't cost you a thing. Price tracking delivers holistic, measurable return on investment (ROI). Save time and money, while helping to increase employee engagement, satisfaction and confidence in your managed travel program.

## Capture missed savings without inconveniencing employees

Price tracking uncovers new savings opportunities on already booked flight and hotel reservations. Using innovative, behind-the-scenes technology, this service automatically searches for price drops using the same flights, hotel properties and travel dates as the original booking. When it finds net savings, a CWT travel counselor rebooks the flight or hotel at the lower price—no traveler intervention required. You get an easy way to ensure employees get the best available fares and rates without increasing your workload or theirs.

## Key features

- **Automated price monitoring.** After booking, price tracking automatically searches for lower prices until 24 hours before departure.
- **Configurable settings.** Use our recommended settings or set custom parameters.
- **Detailed reporting.** An online portal and regular reports enhance spending and savings visibility.
- **Global availability.** Price tracking continues to expand into markets worldwide. Please consult your CWT representative for specific country availability.

**It's a no-brainer.**  
Price tracking drives savings with  
**little to no disruption**  
to our travelers.
